ANALYTIC SUBJECT INDEX

Aggregation (see *Diffusion-limited aggregation*) 153 (1988) 1
Area-preserving map (see *Poincaré–Birkhoff chains*) 153 (1988) 283
Attracting fixed points (see *Dynamical systems*) 153 (1988) 160

Bethe lattice (see *Ising model, inhomogeneous*) 153 (1988) 517
Binary gas (see *Nucleation*) 153 (1988) 573
Biogenesis
– —and the growth of DNA-like polymer chians: a computer simulation - Herrmann and Tsallis 153 (1988) 202
Boltzmann equation
– Solitonic solutions for the generalized two-velocity— - Zanette 153 (1988) 612
Boltzmann equation, discrete (see *Evolution equations*) 153 (1988) 592
Branched polymers
– The collapse transition of—on a fractal lattice - Knežević 153 (1988) 179
Brownian dipole-moment (see *Dielectric relaxation*) 153 (1988) 469
Brownian dynamics simulations (see *Polystyrene spheres*) 153 (1988) 400

Casimir effect (see *Van der Waals force*) 153 (1988) 420
Cavity electrodynamics
– Multiphoton spontaneous emission of an atom in a detuned damped cavity - Fam Le Kien et al. 153 (1988) 492
Cellular automaton (see *Kauffman model*) 153 (1988) 47
Closed surfaces
– Flow of deformable bodies - Schwartz and Edwards 153 (1988) 355
Cluster growth
– Stochastics of nucleation in isolated gases including carrier molecules - Schweitzer et al. 153 (1988) 573
Colloidal suspensions
– Structure and self-diffusion in dilute suspensions of polystyrene spheres: experiment vs. computer simulation and theory - Krause et al. 153 (1988) 400
Conductivity, high field
– Strong electric field effect on weak localization - Hu and O'Connell 153 (1988) 114
Continuous-time resolvent matrix
– The—for non-Markovian chains - Cáceres and Budde 153 (1988) 315
Convection
– Sedimentation and convective flow in suspensions of spherical particles - Felderhof 153 (1988) 217
Correlation reduction (see *Ising model*) 153 (1988) 530
Critical points characterization
– —using probability distributions. I. Liquid–gas phase transition - Güémez et al. 153 (1988) 299
Critical temperature (see *Ising model*) 153 (1988) 530

Crystal fields, spin-correlated
– Spin-correlated crystal fields: a study of two-body and relativistic effects for Gd^{3+} in lanthanum ethylsulphate - Tuszyński and Dixon 153 (1988) 502

Decay, quadratic (see *Decay in quantum mechanics*) 153 (1988) 234
Decay in quantum mechanics
– Deviations from exponential— - Gaemers and Visser 153 (1988) 234
Deformable bodies
– Flow of— - Schwartz and Edwards 153 (1988) 355
Detuned damped cavity (see *Two-level atom*) 153 (1988) 492
Dielectric relaxation
– Memory effect in—I - Uchiyama and Shibata 153 (1988) 469
Diffusion, persistent
– The renewal equation for persistent diffusion - Balakrishnan et al. 153 (1988) 57
Diffusion-limited aggregation
– Multiparticle—with strip geometry - Meakin 153 (1988) 1
Disordering fields
– Random systems, turbulence and— - Domokos et al. 153 (1988) 84
DNA-like polymers
– Biogenesis and the growth of DNA-like polymer chians: a computer simulation - Herrmann and Tsallis 153 (1988) 202
Dynamic structure factor (see *Harmonic liquid*) 153 (1988) 147
Dynamical systems
– On the application of normal forms near attracting fixed points of— - Bountis and Tsarouhas 153 (1988) 160

Eden model
– Relation between the two-dimensional self-avoiding walk and the— - Devillard 153 (1988) 189
Electric field effect, strong (see *Weak localization*) 153 (1988) 114
Entropy, non-equilibrium (see *Harmonic liquid*) 153 (1988) 129
Entropy (see *Quantum mechanical measurements*) 153 (1988) 97
Evolution equations
– On the construction of Lyapunov functions for a class of— - Maass 153 (1988) 592
Exponential decay (see *Decay in quantum mechanics*) 153 (1988) 234

Flory theory
– —of polymeric fractals – intersection, saturation and condensation - Vilgis 153 (1988) 341
Flow of deformable bodies
– — - Schwartz and Edwards 153 (1988) 355
Fluctuations (see *Ising mixed spin system*) 153 (1988) 556
Fractal lattice (see *Polymers, branched*) 153 (1988) 179
Fractal resistor network
– "Thermodynamical formalism" for an infinite hierarchy of—s - Alstrøm et al. 153 (1988) 20
Fractals (see *Polymeric fractals*) 153 (1988) 341
Free energy (see *Flory theory*) 153 (1988) 341

Gd^{3+} in lanthanum ethylsulphate (see *Crystal fields, spin-correlated*) 153 (1988) 502
Growth kinetics
– Multiparticle diffusion-limited aggregation with strip geometry - Meakin 153 (1988) 1
Growth of polymers
– Biogenesis and the growth of DNA-like polymer chians: a computer simulation

- Herrmann and Tsallis 153 (1988) 202

Hall effect
– On the theory of the—in ionic solutions - Kroh and Felderhof 153 (1988) 73
Harmonic liquid
– The "—" away from equilibrium. I. Stationary correlation functions - Bafaluy and Rubí 153 (1988) 129
– The "—" away from equilibrium. II. The dynamic structure factor - Bafaluy and Rubí 153 (1988) 147
Heisenberg model, classical
– Analysis of the Migdal transformation for models with Heisenberg spins on a *d*-dimensional lattice - Schoenmaker and Ruijgrok 153 (1988) 372
Heisenberg spin-1/2 interfaces (see *Superlattice, magnetic*) 153 (1988) 252

Interface (see *Self-avoiding walk*) 153 (1988) 189
Invariants
– —in potential scattering - Muga 153 (1988) 636
Ionic solutions (see *Hall effect*) 153 (1988) 73
Irreversibility (see *Perturbation theory*) 153 (1988) 652
Ising mixed spin system
– Phase transition of the mixed spin system with a random crystal field - Kaneyoshi 153 (1988) 556
Ising model
– An improved theory of higher-order correlations for an—with general spin - Šamaj 153 (1988) 530
Ising model, inhomogeneous
– Inhomogeneous Ising model on the Bethe lattice - Šamaj 153 (1988) 517
Ising spin-1/2 layered media (see *Superlattice, magnetic*) 153 (1988) 252
Ising transition (see *Heisenberg model, classical*) 153 (1988) 372

Kauffman model
– Percolation and spreading of damage in a simplified— - Hansen 153 (1988) 47
Kinematical interaction (see *Optical excitations*) 153 (1988) 266
Kolmogorov equations (see *Persistent diffusion*) 153 (1988) 57

Langevin equation, quantum (see *Conductivity, high field*) 153 (1988) 114
Langevin equation (see *Plasma, two-dimensional*) 153 (1988) 295
Lattice gas, two-dimensional (see *Self-avoiding walk*) 153 (1988) 189
Lattice-gas model (see *Liquid–gas phase transition*) 153 (1988) 299
Light scattering (see *Polystyrene spheres*) 153 (1988) 400
Lipid monolayers
– A theory of monolayer phase transitions - Ruijgrok and Sokalski 153 (1988) 390
Liquid–gas phase transition
– Critical points characterization using probability distributions. I.— - Güémez et al. 153 (1988) 299
Long time tails (see *Lorentz gas*) 153 (1988) 67
Lorentz gas
– Long time tails in a— - Das and Ernst 153 (1988) 67
Lyapunov functions
– On the construction of—for a class of evolution equations - Maass 153 (1988) 592

Magnetic ordering (see *Ising model, inhomogeneous*) 153 (1988) 517

Marginal distribution (see *Non-Markovian processes*) 153 (1988) 326
Markovian diffusion (see *Persistent diffusion*) 153 (1988) 57
Master equation (see *Ornstein–Uhlenbeck noise*) 153 (1988) 619
Mean spherical approximation (see *Yukawa fluid, hard-sphere*) 153 (1988) 605
Measuring process (see *Quantum mechanical measurements*) 153 (1988) 97
Membranes
– Flow of deformable bodies - Schwartz and Edwards 153 (1988) 355
Memory effect (see *Dielectric relaxation*) 153 (1988) 469
Memory kernel (see *Non-Markovian processes*) 153 (1988) 326
Migdal renormalization
– Analysis of the Migdal transformation for models with Heisenberg spins on a *d*-dimensional lattice - Schoenmaker and Ruijgrok 153 (1988) 372
Monolayers, lipid
– A theory of monolayer phase transitions - Ruijgrok and Sokalski 153 (1988) 390
Multiphoton emission
– Multiphoton spontaneous emission of an atom in a detuned damped cavity - Fam Le Kien et al. 153 (1988) 492

Noise (see *Ornstein–Uhlenbeck noise*) 153 (1988) 619
Non-Markovian chains
– The continuous-time resolvent matrix for— - Cáceres and Budde 153 (1988) 315
Non-Markovian processes
– Marginal distribution of non-Markovian stochastic processes with internal states - Budde and Cáceres 153 (1988) 326
Normal forms
– On the application of—near attracting fixed points of dynamical systems - Bountis and Tsarouhas 153 (1988) 160
Nucleation
– Stochastics of—in isolated gases including carrier molecules - Schweitzer et al. 153 (1988) 573

1:3 resonance (see *Poincaré–Birkhoff chains*) 153 (1988) 283

Optical excitations
– Kinematical interaction of—and consequences - Kozmidis-Luburić and Tošić 153 (1988) 266
Ornstein–Uhlenbeck noise
– An approximate master equation for systems driven by linear— - Łuczka 153 (1988) 619
Oscillator, harmonic
– The "harmonic liquid" away from equilibrium. II. The dynamic structure factor - Bafaluy and Rubí 153 (1988) 147
Oscillators, harmonic
– The "harmonic liquid" away from equilibrium. I. Stationary correlation functions - Bafaluy and Rubí 153 (1988) 129

Pair correlation function (see *Yukawa fluid, hard-sphere*) 153 (1988) 605
Percolation
– —and spreading of damage in a simplified Kauffman model - Hansen 153 (1988) 47
Percolation (see *Diffusion-limited aggregation*) 153 (1988) 1
Persistent diffusion
– The renewal equation for— - Balakrishnan et al. 153 (1988) 57
Perturbation theory
– Subdynamics and—in wave-functions space - Muga 153 (1988) 652

Phase transitions (see *Lipid monolayers*) 153 (1988) 390
Plasma, magnetized
– Statistical properties of two-dimensional magnetized plasmas - Katou 153 (1988) 295
Plasma, two-dimensional
– Statistical properties of two-dimensional magnetized plasmas - Katou 153 (1988) 295
Poincaré–Birkhoff chains
– The birth of twin—near 1:3 resonance - van der weele et al. 153 (1988) 283
Polymeric fractals
– Flory theory of—– intersection, saturation and condensation - Vilgis 153 (1988) 341
Polymers, branched
– The collapse transition of branched polymers on a fractal lattice - Knežević 153 (1988) 179
Polystyrene spheres
– Structure and self-diffusion in dilute suspensions of—: experiment vs. computer simulation and theory - Krause et al. 153 (1988) 400
Potential scattering
– Invariants in— - Muga 153 (1988) 636
Pulse excitations (see *Transient light scattering*) 153 (1988) 441

Quantum mechanical measurements
– Ten theorems about— - van Kampen 153 (1988) 97
Quantum statistical mechanics (see *Van der Waals force*) 153 (1988) 420

Random crystal field (see *Ising mixed spin system*) 153 (1988) 556
Random perturbations (see *Transient light scattering*) 153 (1988) 441
Random systems
– —, turbulence and disordering fields - Domokos et al. 153 (1988) 84
Random walk (see *Non-Markovian chains*) 153 (1988) 315
Relativistic crystal field operators (see *Crystal fields, spin-correlated*) 153 (1988) 502
Renormalization, real-space (see *Polymers, branched*) 153 (1988) 179
Renormalization-group method (see *Liquid–gas phase transition*) 153 (1988) 299
Resistor network, fractal
– "Thermodynamical formalism" for an infinite hierarchy of fractal resistor networks - Alstrøm et al. 153 (1988) 20
Roughening dynamics (see *Self-avoiding walk*) 153 (1988) 189

Scattering of light
– Transient resonant light scattering under random perturbations - Maruyama et al. 153 (1988) 441
Scattering theory (see *Invariants*) 153 (1988) 636
Sedimentation
– —and convective flow in suspensions of spherical particles - Felderhof 153 (1988) 217
Self-avoiding walk
– Relation between the two-dimensional—and the Eden model - Devillard 153 (1988) 189
Self-diffusion (see *Polystyrene spheres*) 153 (1988) 400
Sierpinski gasket (see *Fractal resistor network*) 153 (1988) 20
Solitonic solutions (see *Boltzmann equation*) 153 (1988) 612
S.O.S. model (see *Self-avoiding walk*) 153 (1988) 189
Spontaneous emission
– Multiphoton—of an atom in a detuned damped cavity - Fam Le Kien et al. 153 (1988) 492
Spreading of damage
– Percolation and—in a simplified Kauffman model - Hansen 153 (1988) 47

Squeezed states phase space representation
– On the equivalence between the wave-packet phase space representation (WPPSR) and the phase space generated by the squeezed states - Mizrahi and galetti 153 (1988) 567
Stationary correlation functions (see *Harmonic liquid*) 153 (1988) 129
Structure factor (see *Polystyrene spheres*) 153 (1988) 400
Subdynamics
– —and perturbation theory in wave-functions space - Muga 153 (1988) 652
Superlattice, magnetic
– Magnetic superlattices: static properties - Valadares and Plascak 153 (1988) 252
Supersaturation (see *Nucleation*) 153 (1988) 573
Suspensions of spherical particles
– Sedimentation and convective flow in— - Felderhof 153 (1988) 217

Three-particle boson processes
– Kinematical interaction of optical excitations and consequences - Kozmidis-Luburić and Tošić 153 (1988) 266
Time-resolved spectra (see *Transient light scattering*) 153 (1988) 441
Transient light scattering
– Transient resonant light scattering under random perturbations - Maruyama et al. 153 (1988) 441
Transition temperature (see *Ising mixed spin system*) 153 (1988) 556
Turbulence
– Random systems,—and disordering fields - Domokos et al. 153 (1988) 84
Two-level atom
– Multiphoton spontaneous emission of an atom in a detuned damped cavity - Fam Le Kien et al. 153 (1988) 492
Two-velocity gas (see *Boltzmann equation*) 153 (1988) 612

Van der Waals force
– —derived form a quantum statistical mechanical path integral method - Brevik and Høye 153 (1988) 420
Vapour–carrier gas (see *Nucleation*) 153 (1988) 573
Velocity correlation function (see *Lorentz gas*) 153 (1988) 67
Voltage distribution (see *Fractal resistor network*) 153 (1988) 20

Wave-functions space
– Subdynamics and perturbation theory in— - Muga 153 (1988) 652
Wave-packet phase space representation
– On the equivalence between the—(WPPSR) and the phase space generated by the squeezed states - Mizrahi and galetti 153 (1988) 567
Weak localization
– Strong electric field effect on— - Hu and O'Connell 153 (1988) 114

Yukawa fluid, hard-sphere
– Pole expansion determination of the pair correlation function of a simple fluid - Kok 153 (1988) 605

Zero-field splitting (see *Crystal fields, spin-correlated*) 153 (1988) 502
